

Enterprise Mobile Office

View, Edit Microsoft Office (Word, Excel and PowerPoint) Documents with Secure Mobility!

Along with employee ease of use in the mobile work environment and guaranteed work productivity, security is the key element in implementing a perfect “smart” work environment. A truly smart work environment can be achieved through document viewing and security features for information protection with the powerful features of Polaris Office, the most popular office software for mobile devices.

Key Benefits

Polaris Office for MobileIron is a Mobile Office application that allows MobileIron users to view/edit Microsoft Office (Word, Excel and PowerPoint) documents on Smartphone and Tablet. Users can view/edit text files and view .pdf and .hwp files as well. Polaris Office’s excellent rendering quality shows all the texts, charts, pictures and etc. of the documents made with Microsoft Office on a PC as the original itself without any losses. And Polaris Office for MobileIron provides powerful editing features and an intuitive interface that allows you to edit document easily. Now, you can safely and conveniently view/edit important documents on your Mobile devices.

Key Features

- **High Rendering Quality**
Enhanced support for Microsoft Office formats, supports 3D shape, chart, and Smart Art
- **Setting up various object inserts and formats**
Supports 160 shapes, 20 types of charts
- **Fully presentations**
Slide show, 34 slide transition effects, inserting videos
- **Provides PDF annotations and memo**
- **Optimized UX for each device**

Availability

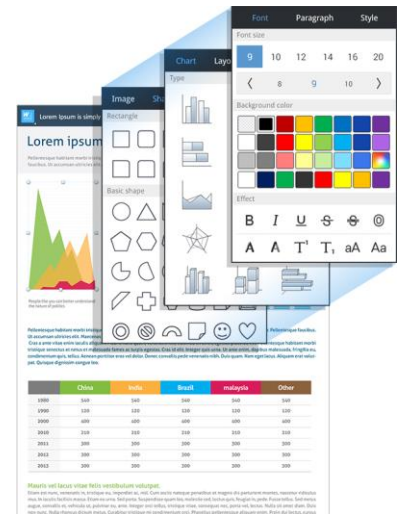

Polaris Office supports both iOS and Android. If you have any questions about Polaris Office, please feel free to contact us at any time. (kenny@infrawareglobal.com)
